for Registrar General, India.

NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the National Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in the Provinces of India and some of the Indian States for the week ending the 19th November, 1949.

REMARKS

The figures of births and deaths shown in this statement for the week ending the 19th November, 1949 relate to 190 towns with an estimated population of 24,728 thousands. The total number of towns is 224 and their population is 27,293 thousands. Thus 85% of the total number of towns representing 91% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 14,228 and 10,462 representing birth and death rates of 40.4 and 20.0 per thousand of population respectively.

(A) *Indian Provinces.*—The data here relate to 166 towns with an estimated population of 21,999 thousands. Information for Bihar and Assam could not be included. The total number of towns is 192 and their population is 23,759 thousands. Thus 86% of the total number of towns representing 93% of the total population is covered. The numbers of births and deaths recorded in these towns were 17,364 and 9,573 representing birth and death rates of 41.0 and 22.6 per thousand of population respectively. The table at the end gives the position by provinces.

The towns of Pandharpur in Bombay, Banaras and Mirzapur—Vindhyachal in U. P. recorded high death rates of 67.5, 54.2 and 53.3 per thousand of population respectively. In Pandharpur, the high death rate was not due to any one of the specified causes. In Banaras and Mirzapur—Vindhyachal the high death rates were largely due to deaths from fevers.

(B) *Unions and States.*—The data here relates to 24 towns with an estimated population of 2,729 thousands. The total number of towns is 32 and their population is 3,534 thousands. Thus 73% of the total number of towns representing 77% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,864 and 889 representing birth and death rates of 35.5 and 16.9 per thousand of population respectively. Ernakulam was the only town which had a high death rate of 57.7 per thousand of population but this high death rate was not due to any one of the specified causes.
